Pre-Catheterization Examination Guidelines

1. Carefully read and understand the consent form.
2. Sign the examination consent form and information sheet.
3. Properly shave the hair around the examination area.
4. Check the pulse strength and mark the area accordingly.
5. Change into the surgical gown.
6. A family member should accompany the patient to the examination room.
7. Do not stop taking medication or fast on your own.
8. Use the restroom to urinate before the examination.
9. Local anesthesia will be administered during the procedure.
10. Inform the doctor immediately if you feel any discomfort during the examination.
